### INTERVIEW SUMMARY

Dear Sir:

This paper summarizes a brief interview between Examiner Hall and the undersigned on 8/27/07. Claim 15 was the subject of the discussion, the content of which has been incorporated into the Amendment submitted 8/30/07. The undersigned parsed most elements of Claim 15, describing the desired effect of shadow tolerance. Shadow tolerance motivated the invention, and also serves as a suggested use. Allowability was not determined, but agreement was reached that Claim 15 could benefit from some amendment. The examiner proposed that the suggested use be incorporated, and the undersigned observed during the parsing that it might not be clear in the claim as originally filed that light was dispersed by each subregion over the "same" target region.

Respectfully submitted,

9-4-2007
